

Make a paper snowflake:

Fold one corner across the paper until the outer edges meet. Crease.

Cut off excess paper.

Fold triangle in half again, so that you have a smaller, four-layer triangle

Fold that triangle into thirds. Hint: Fold one flap forward and one flap backward.

Cut straight along the bottom so that all layers are the same size and shape.

Cut along the edges to create your one-of-a-kind snowflake design.

A: outer edge

B: center

C & D: interior design
